Best of luck to students in grades 6-12 as you take your NWEA English tests this week. Please take these tests seriously and make a real point to give us your absolute best efforts. Take your time, read each question carefully, and don't race through them. These tests provide us with information about your current abilities levels and help us to fine tune or curriculums to better meet your needs. They only work, though, if they reflect your best efforts. Thank you in advance for your help with this and GO WOLVES!!!
